CEDAR GREENHOUSES, PAVILIONS

& BESPOKE BUILDINGS

ABOUT US

Woodpecker Joinery was founded in 1994 by Christopher Waltho, a dedicated and talented craftsman.

From a farming background, an early memory was spending many hours helping his father lovingly craft a wooden greenhouse. His natural and creative flare for design became apparent during Chris' school days, as did his love for and interest in working with wood. Chris went on to study woodwork at NVQ level and gained a City and Guilds certificate. Along the way many things added to career development; serving an apprenticeship at the age of 17 with a local joinery company manufacturing doors, conservatories and windows, and in the engineering field acquiring knowledge of design. A lifelong dream had always been to one day start his own business.

After being made redundant from the engineering firm, Chris applied for a Government grant. The application was successful and he became a sole trader based at his mother's smallholding in Bramshall, Staffordshire. He continued in what he knew best - manufacturing windows, doors and conservatories. During the next three years a reputation for good quality products grew, as did a customer base. In 1997, after being approached by an aluminium greenhouse supplier to provide a bespoke cedar greenhouse, the first Woodpecker greenhouse was produced. Inspired by his creation, market research followed and it became apparent there was a keen British interest in gardening but few companies who specialised in cedar greenhouses.

Chris began to develop a website and engineer a range of Western Red Cedar greenhouses. Orders flowed in and eventually it became too much work for one person. Realizing the need for help he approached his brother Louis, fiancée Louise, cousin Joe and Tom, a family friend. Long hours, hard work and dedication were called for - together we were a strong and determined team. The popularity of our products exceeded expectations; we were full of optimism and looking forward to the future. That was until tragically on Christmas Day 2004 at the age of 20, Joe passed away in a car accident. He is sadly missed and fondly remembered.

During summer months we had extra hands on board from University students Bobby, Ross and James, who would help out both in the workshop and installing our products. In October 2005 Joe joined the team, followed by Craig in 2006. All of the aforementioned would prove significant in Woodpecker's future. Thankfully our success over the next four years continued. After careful consideration a decision was made in order for Woodpecker Joinery to develop and move forward, we would need to move to larger premises.

In 2008, with nine employees, we moved to an industrial unit in Hixon, Staffordshire on which a lease was taken. Having additional space improved manufacturing efficiency and productivity. Demand for our products continued to expand and in 2009 we were approached by the BBC to produce a greenhouse for the Gardener's World programme. Our greenhouse was featured in the series hosted by Toby Buckland. We have exported our products to Ireland, France, Belgium, Denmark, Germany, Falkland Islands and even as far as Australia! We import all of our PEFC certificated cedar direct from Canada. Over a period of three years our business continued to blossom and we came to occupy three units on the Industrial Estate, outgrowing even these. Time to move again…

In December 2012, with 30 employees, we moved back to Chris' roots, purchasing our own premises in Bramshall. Our business has expanded and we sell cedar wood UK wide, having more orders than ever before and the luxury of being in our own premises. We have renovated the office space and workshops. Tom is Head Joiner, Joe Works Foreman, Louis Head of Painting Department, Bobby our Manager, Ross Imports and Exports Manager, Craig Head Site Foreman and James Head of the Technical Department. We continue in the development of young people and training within the workplace. With special thanks to Mary (Chris's mum) without your patience, time and help none of this would have been possible.

THE LOXLEY

Delivered and installed in Oxfordshire. Colour—Light Brown

The Loxley is a 6ft 6” x 6ft 6” octagonal cedar greenhouse, which provides a neat and tidy solution for any location where space is limited.

Standard features:

- Made from 100% Western Red Cedar
- 6ft 4” to eaves
- 4mm English toughened safety glass
- No block to hold glass in place, the glass overhangs the wood
- One roof vent with Mk7 Bayliss autovent and two manual side opening vents
- FREE staging on five bays and three high level shelves
- Standard colours available
- Glass to ground, cedar panels to staging height or a combination at no extra cost
- Locking door (hinges on left or right)
- OPTIONAL EXTRAS: Guttering and downpipes. Maintainance free roof.

Price: £1995 including VAT, delivery and installation anywhere in mainland UK

THE DAGDALE

Delivered and installed in Yorkshire. Colour—Red Cedar

The Dagdale is 8ft 3" x 8ft 3" and a popular, stylish and elegant alternative to the traditionally shaped greenhouse. It provides an excellent solution for the smaller sized garden. Decagonal in shape, it offers a large internal working area, maximising your space. This model allows for plenty of light, making it ideal for starting off young plants.

An attractive feature that will enhance your garden all year round, the Dagdale is a high spec greenhouse.

Standard features:

- Entirely Western Red Cedar construction
- 6ft 4" to eaves
- 4mm English toughened safety glass
- No block to hold glass in place, the glass overhangs the wood
- Two auto roof vents (Bayliss Mk7) and two side vents
- FREE staging and shelves fitted (staging fitted on seven bays, shelves on three)
- Locking door (hinges on left or right)
- Glass to ground, cedar panels to staging height or a combination at no extra cost
- Standard colours available
- OPTIONAL EXTRAS: Guttering and downpipes. Maintainance free roof.

Price: £2250 including VAT, delivery and installation anywhere in mainland UK

THE STRAMSHALL

Delivered and installed in The Cotswolds. Colour—Clear

The Stramshall is one of our most popular greenhouses, combining style with functionality. Measuring 6ft 6” x 8ft 6” this greenhouse is compact, yet maximizes the available space due to its octagonal shape.

Double doors allow easy access, and as with all of our greenhouses, the sides can be panelled, glass to ground or a combination of both at no extra cost.

Standard features:

- Entirely Western Red Cedar construction
- 6ft 4” to eaves
- 4mm English toughened safety glass
- No block to hold glass in place, the glass overhangs the wood
- Two auto roof vents (Bayliss Mk7) and two side vents
- FREE staging and shelves fitted (staging fitted on five bays, shelves on three)
- Locking double doors (handle on left or right)
- Glass to ground or cedar panels to staging height at no extra cost
- Standard colours available
- OPTIONAL EXTRAS: Guttering and downpipes. Maintainance free roof.

Price: £2195 including VAT, delivery and installation anywhere in mainland UK

THE BRAMSHALL

Delivered and installed in Abergavenny. Colour—Clear. Fitted with maintenance free capped roof (Optional Extra)

Measuring 10ft x 8ft 3", this greenhouse maximises the potential of any garden and provides an attractive working space. Double doors provide easy access and staging on seven sides with high-level shelving on three sides giving an ideal surface for potting, planting and growing. A practical and stylish addition to any outdoor space, the Bramshall features two roof vents with autovents as standard, black antique door and window furniture, cedar construction and 4mm English toughened safety glass.

Standard features:

- Entirely Western Red Cedar construction
- 6ft 4" to eaves
- 4mm English toughened safety glass
- No block to hold glass in place, the glass overhangs the wood
- Two auto roof vents (Bayliss Mk7) and two side vents
- FREE staging and shelves fitted (staging fitted on seven bays, shelves on three)
- Locking double doors (handle on left or right)
- Glass to ground, cedar panels to staging height or a combination at no extra cost
- Standard colours available
- OPTIONAL EXTRAS: Guttering and downpipes. Maintainance free roof.

Price: £2500 including VAT, delivery and installation anywhere in mainland UK

THE HIXON

Delivered and installed in Northumberland. Colour- Light Brown

The Hixon is new to our range of greenhouses. Measuring 10ft x 12ft, the decagonal shape gives a large internal space, which offers the potential for use as a garden studio or summerhouse as well as a greenhouse. Featuring double doors, four automatically opening roof vents and two side opening windows for optimum ventilation, there are no limits to the practicality of this elegant structure.

Standard features:

- Entirely Western Red Cedar construction
- 6ft 4" to eaves
- 4 mm English toughened safety glass
- No block to hold glass in place, the glass overhangs the wood
- Four auto roof vents (Bayliss Mk7) and two side vents
- FREE staging and shelves fitted (staging fitted on seven bays, shelves on three)
- Locking double doors
- Glass to ground, timber panels to staging height or a combination at no extra cost
- Standard colours available
- OPTIONAL EXTRAS: Guttering and downpipes. Maintainance free roof.

Price £4000 including VAT, delivery and installation anywhere in mainland UK

ROUND BUILDING OPTIONAL EXTRAS

Bramshall greenhouse fitted with a brown capped maintenance free roof and guttering

MAINTENANCE FREE ROOF

With our unique designed system, the glass sits on top of the rafters on a rubber gasket and is held in place by a stainless steel screw through the aluminium into the rafter. The rubber gaskets form a watertight seal to ensure that the greenhouse is weatherproof. This system leaves no wood on the roof exposed to the elements, making looking after your greenhouse a pleasure, not a chore! The maintenance free roofing system also reduces glass vibration in high winds - beneficial in coastal and exposed areas.

See page 24 for more information about the system and colour options.

Loxley and Stramshall	**£250**
Dagdale, Bramshall and Hixon	**£300**

GUTTERING OPTION

The mini flow gutter fitted to our round greenhouse range is a discreet option, which allows the collection of rain water. The guttering system is available in a range of colours including brown, grey and black.

Loxley and Stramshall	**£165**
Dagdale, Bramshall and Hixon	**£240**

FREESTANDING CHARTLEY

Delivered and installed in South Yorkshire- Clear. Size: 6ft x 8ft

The Chartley is probably one of the best value-for-money cedar greenhouses available on the UK market. The Chartley comes in a range of standard sizes, and has an eaves height of 6ft (eaves height adjustment is not an available option).

The framework is constructed entirely from Western Red Cedar and glazed with 4mm toughened safety glass to the ground, to allow maximum sunlight to reach your plants. Automated roof vents allow ventilation around the greenhouse to keep it cool in the summer. A quality product at an affordable, sensible price. The Chartley is new to our range and is bound to prove another popular choice for avid and amateur gardeners alike.

Standard features:

- Entirely Western Red Cedar construction with 6ft height to eaves
- Glass to ground level only
- 4mm English toughened safety glass
- Fully vented ridge system
- Black antique door and window furniture & 4" guttering and downpipes as standard
- Aluminium capping in a choice of colours for a maintenance free roof

Price includes VAT, delivery and installation anywhere in mainland UK

The Chartley greenhouse includes as standard -

Maintenance free aluminium roof available in a choice of colours

Louvre vent boosts air circulation in your greenhouse

Aluminium base plinth stops standing water sitting on the timber base

New Fully Vented Roof System!

Standard features of the Chartley Greenhouse -

Aluminium ridge, maintenance free roof & cresting
Aluminium base plinth
Large 4" guttering and down pipes
Includes delivery and installation
Tall 6ft eaves
Hinged locking door
4mm Toughened safety glass
10 year structural guarantee

Hand made in the UK
100% Western Red Cedar Construction
Window section 2"x 2" timber
Roof section 2"x 3" timber
Glass to ground glazing

THE BROMLEY

Delivered and installed in Ayrshire. Colour- Clear. Size: 8ft x 10ft

We guarantee that you will be impressed with our traditional Bromley greenhouse. This solid, hand-crafted product is one of the strongest quality greenhouses available on the UK market, which is why it has proved to be so popular. Careful consideration is given to every aspect resulting in a superb and high quality greenhouse.

The framework is constructed entirely from Western Red Cedar (*Thuja Plicata*) which produces natural oils that act as preservatives to protect the wood from insect attacks and decay. Beauty aside, the Western Red Cedar's practicality and cellular structure creates air spaces that give it an insulation value higher than most woods. Buildings featuring cedar panels tend to stay warmer in the winter. Automated roof vents allow ventilation around the greenhouse to keep it cooler in the summer.

The Bromley is available with cedar panels or a combination of panelling and glass to ground. Cedar panels help to lower heating costs and add character to the overall look of the building. Having some glass to ground gives you extra light and is ideal when you need growth from ground level.

This heavy duty structure combines strength, durability, style and beauty. An attractive feature to complement any surrounding; it is built to meet the requirements of the most demanding gardening enthusiast or professional alike.

Our aim over the years has been to design and manufacture a high quality greenhouse at a realistic price. We are proud to say that we have achieved this in the form of the Bromley.

THE BROMLEY

Standard features:

- Window sections are constructed from 2" x 2" timber and a sturdy 2" x 3" is used for the rafters
- 4mm English toughened safety glass
- 5ft, 5ft 6" (standard) or 6ft eaves height
- 31° roof pitch
- Choice of cedar panels to staging height or a combination of cedar panels and glass to ground at no extra cost
- Anodised Bayliss autovents Mk7
- Ridge cresting and finials
- Rainwater gutters and downpipes
- Locking hinged door with antique furniture
- Freestanding two-tier staging along one side
- Choice of standard colours
- OPTIONAL EXTRA: Aluminium capping for a maintenance free roof

THE KINGS BROMLEY

Delivered and installed in Gloucestershire. Colour—Clear**. Size: 10ft x 14ft**

The Kings Bromley greenhouse is an amalgamation of the Bromley and Kingsbury models, featuring a 45º pitch with wider 22" panes. This is an update on the Victorian style, giving the classic shape and height with a contemporary twist. This greenhouse is a beautiful and functional feature for any setting and can be manufactured to any size required; fitted on to your dwarf wall or freestanding at no extra cost.

Standard features:

- Western Red Cedar construction
- Eaves height - range from 5ft or 5ft 6" (no extra cost)
- 22" panes of 4mm English toughened safety glass
- 45° roof pitch
- Locking hinged door with antique fittings
- Anodised Bayliss autovents Mk7
- Ridge cresting and finials
- Rainwater gutters and downpipes
- OPTIONAL EXTRA: Aluminium capping for a maintenance free roof

THE KINGSBURY

Delivered and installed in Newcastle-Upon-Tyne. Colour—Clear**. Size: 8ft x 12ft**

Our classic interpretation of a Victorian Greenhouse would be a tasteful and elegant addition to any garden. As with most of our garden buildings, the Kingsbury can be made in a variety of sizes (both standard and non-standard). This model will, without doubt, maximise the potential of your landscape.

The 45º pitch and 12" panes provide a more traditional style, ideal for older heritage properties. As with many of our greenhouses, the Kingsbury can be made to your required size and specification.

Standard features:

- Constructed from 100% Western Red Cedar
- 12" panes of 4mm English toughened safety glass
- 45° Pitch
- Choice of standard colours
- Anodised Bayliss autovents Mk7
- Ridge cresting and finials
- Rainwater gutters and downpipes
- Locking hinged door with antique fittings
- OPTIONAL EXTRA: Aluminium capping for a maintenance free roof

BESPOKE GREENHOUSES

Delivered and installed in Ross on Wye. Colour—Dark Brown**. Size: 13ft x 60ft**

Our team at Woodpecker Joinery proudly brings our well-known bespoke range of products to you. Combining quality, excellence and beauty with superb value for money, we guarantee you complete satisfaction. We can build anything to complement your surroundings and make your gardening dreams come true, giving you everything you have ever wanted from a greenhouse.

Delivered and installed in Cambridgeshire. Colour—Clear**. Size: 10ft x 20ft**

BESPOKE GREENHOUSES WITH PORCH

If your garden requires something more, we have the perfect design feature for you. A beautifully proportioned porch, either inline or protruding, adds that extra touch to lift your greenhouse and make it a real focal point of your garden.

Delivered and installed in Denmark. Colour—Clear**. Size: 12ft x 18ft**

The advantages of a Bespoke building are: any size and style of building is possible, can be built to your exact specification. A choice of freestanding, lean-to or fitted on to a dwarf wall.

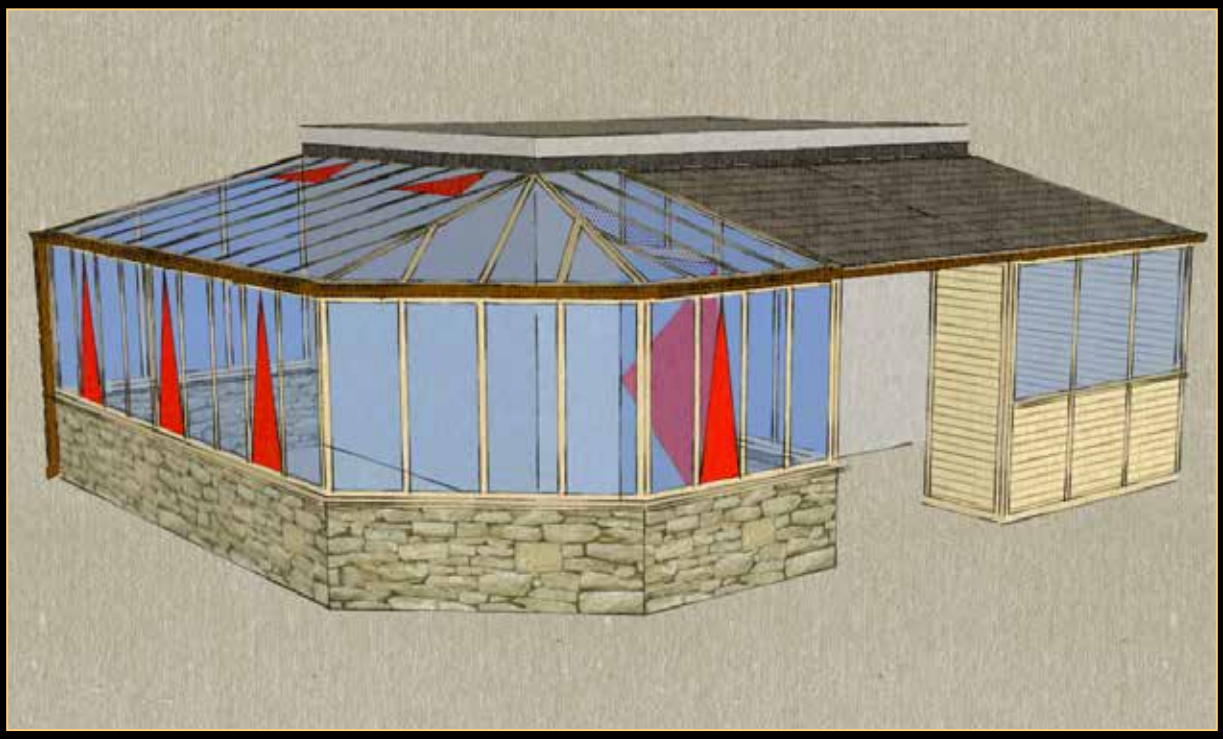
Delivered and installed near Macclesfield. Colour—Clear**. Size: 12ft x 26ft**

Written quotations available on request

BESPOKE DRAWING SERVICE

Our dedicated design team use the latest CAD drawing and 3D modelling packages to enable us to push the boundaries and create our unique bespoke buildings. We are also able to produce drawings for planning purposes and provide any technical advice you may need, to make purchasing a greenhouse as easy and straightforward as possible.

Out of the ordinary, intricate or something you perhaps thought was not possible - we have the perfect solution. Just let us know what your dream is and we will help you to achieve your vision.



Delivered and installed in The Highlands. Colour—Clear

LEAN-TO GREENHOUSES

Delivered and installed in Hertfordshire. Colour—Light Brown**. Size: 10ft x 20ft**

If you have a location available on your house wall it is an ideal spot to site a lean-to greenhouse. Fitted on to your dwarf wall, or with cedar panels or glass to ground - the choice is yours. Each building is created individually to your unique requirement. Constructed entirely from Western Red Cedar and using 4mm English toughened safety glass.

Delivered and installed in Warwickshire. Colour—Clear**. Size: 10ft x 18ft**

Written quotations available on request

THE VANDENBURG

Delivered and installed in The Cotswolds. Colour—Clear**. Size: 8ft x 10ft**

The Vandenburg is an impressive and unique building, elegantly crafted from Western Red Cedar. This collection has the space and style of the Edwardian glasshouse, combining beauty with functionality. It is the perfect enhancement to a fine English garden, a structure that will bring pleasure and at the same time offer an exceptional gardening experience. All individually hand crafted and engineered by our team of highly skilled craftsmen using age old mortice and tenon jointing. Tailor made to your requirements, whether lean-to or freestanding- the choice is yours.

All glazing is English toughened safety glass, firmly secured with our aluminium capping for a maintenance free roof against a gasket, which seals the underside of the glazing achieving high storm- and wind-proof standards.

Standard features:

- Aluminium capping for maintenance-free roof as standard on this model
- Rainwater gutters and downpipes & anodised Bayliss roof autovents Mk7
- Locking hinged double door with antique fittings
- Elegant hipped roof
- Choice of styles - freestanding, lean-to, panelled, glass to ground or fitted on to a dwarf wall. Choice of Colours

PAINTED GREENHOUSES

Although cedar wood has a natural beauty which suits most settings, here at Woodpecker Joinery we recognise that many of our customers require a different finish to match existing buildings or complement the age and style of their property. Therefore, we are pleased to be able to offer a high quality painted finish, which is available on all of our greenhouses.

The paint applied to our products is specially selected for exterior use on Western Red Cedar and is provided by leading Oxford-based paint manufacturer Teknos. The paint is based on a microporous system, which allows the timber to breathe but creates a durable waterproof barrier, protecting the timber from the elements. Teknos paint is resistant to bacterial and fungal attack, and UV degradation, so is easily maintained.

Delivered and installed in Suffolk**. Size: 13ft x 34ft**

Delivered and installed in Essex**. Size: 10ft x 16ft**

Delivered and installed in Devon**. Size: 8ft x 16ft**

Delivered and installed in Buckinghamshire **. Size: 6ft x 10ft**

Please note that the cost of this finish is approximately 40% of the greenhouse price due to its technical nature. There is also an increased waiting time because of the additional processing the timber requires prior to treatment.

THE CENTAUR

Delivered and installed in Somerset. Colour—Clear**. Size: 12ft x 8ft**

The Centaur greenhouse is designed to offer both a practical greenhouse space and a discreet storage area. The shed is fully lockable and perfect for storing growing consumables and seasonal tools. The greenhouse has all of the features of a standard Woodpecker greenhouse including autovents and an option of cedar panels or glass to ground.

Standard features:

- Western Red Cedar construction
- Maintenance free greenhouse roof
- 4mm English toughened safety glass
- Both greenhouse and shed doors are fully lockable
- 48” x 24” glass window in partition
- Greenhouse is fitted with an extra wide roof vent and Bayliss autovent opener
- Rainwater gutters and downpipes

8ft wide x 8ft deep	**£3650**
8ft wide x 10ft deep	**£4000**
10ft wide x 8ft deep	**£4200**
10ft wide x 10ft deep	**£4550**
12ft wide x 12ft deep	**£5800**
12ft wide x 14ft deep	**£6200**

Price includes VAT, delivery and installation anywhere in mainland UK

THE SHED COMBO

Delivered and installed in The Cotswolds. Colour—Clear**. Size: 6ft x 12ft**

Woodpecker Joinery has been including shed elements within our customers' cedar greenhouses for many years. Each shed and greenhouse combination structure has been designed to our customers' exact specification. This ensures the most practical use of space available in the garden for both storage and growing. Our team at Woodpecker Joinery can offer you a full design service, including 3D sketches to fully describe door placement, roof engineering and even a special partition design.

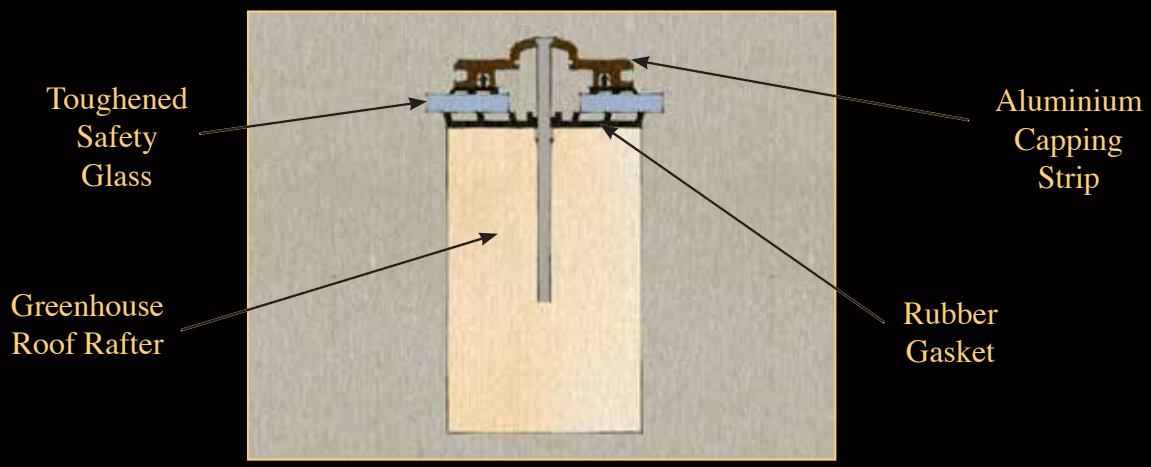
Written quotations available on request

GREENHOUSE ACCESSORIES

ALUMINIUM CAPPING

Although Cedar Wood is very durable due to it's natural oils, and generally requires staining only once every 2-3 years, our aluminium capping (optional with some of our greenhouses) provides a maintenance free roof for those who wish to avoid climbing to attend their greenhouse. The capping leaves no wood on the roof exposed to the elements, making looking after your greenhouse a pleasure, not a chore!

HOW OUR CAPPING SYSTEM WORKS:



With this system, the glass sits on top of the rafters on a rubber gasket and is held in place by a stainless steel screw through the aluminium into the rafter. The rubber gaskets form a watertight seal to make sure that the greenhouse is weatherproof.

ALUMINIUM CAPPING COLOUR OPTIONS:

Brown	Black	Slate Grey	White	Holly Green

GREENHOUSE BLINDS

Greenhouse blinds can be fitted to shade the side or roof sections of a greenhouse. The blinds provide a compact solution to reduce sunlight exposure and prevent your greenhouse from overheating. Woodpecker Joinery greenhouse blinds are spring tensioned which prevents the greenhouse blind from sagging and also allows for auto feeding retraction.

LOUVRE VENTS

Louvre vents can be installed in addition to roof vents to increase air circulation throughout the greenhouse. Hot air escaping from the greenhouse through the roof vents forces air to travel in through the louvre. The airflow through the louvre vent can be regulated by the angle of the louvre blades, thus giving further control over the greenhouse growing conditions.

BAYLISS AUTOVENT MK7

Above picture shows a triple spring autovent

The Bayliss Mk7 Autovent has been designed for aluminium or timber framed hinged vents measuring up to approximately 2 square feet (60cm^2).

It fits neatly, close to the glass, consequently taking up less headroom than a normal stay on a roof vent. This model is attached to the vent, and can be set to start opening the vent at temperatures between 55ºF (12ºC) and 75ºF (25ºC), giving a maximum vent opening of approximately 12". Autovents operate on a wax cylinder system, so requires no electricity.

HOME OFFICE

Delivered and installed in Hertfordshire. Colour—Clear**. Size: 12ft x 12ft**

Woodpecker Joinery proudly presents our range of Home Offices. The perfect space for study, work or simply relaxing! We can build the office to any size you require and can alter the specification to suit your needs.

Delivered and installed in Berkshire. Colour—Clear**. Size: 10ft x 10ft**

Standard features:

- Western Red Cedar construction

8ft x 8ft	**£2750**	**10ft x 10ft**	**£3250**

GARDEN BUILDINGS

Delivered and installed in Kent. Colour—Clear**. Size: 10ft x 10ft**

Our beautiful Cedar buildings have been designed to provide a stylish and practical outdoor space. The natural beauty of the cedar in both the framework and the shingled roof is sure to enhance any garden, and it's durability means that it will stand up to the British climate. The custom made ridge point is a contemporary feature which complements the honey tones of the timber perfectly.

We manufacture our garden buildings in a range of sizes and shapes to suit your needs, but if you have any particular requirements, do let us know. Our talented joiners will work to create something special and ensure that your garden buildings becomes an idyllic retreat in your own garden and the perfect venue for outdoor summer entertaining, or just relaxing on a lazy Sunday afternoon.

All of our garden buildings have the option of including a Western Red Cedar shingle roof. A shingled roof requires very low maintaince due to the high natural concentration of preservatives and therefore boasts a longer life time than the felt roof alternative. They are a very durable option and preform well when subject to strong winds and heavy rainfall. In addition shingles contain a very high insulative value which keeps a garden room cooler in the summer and warmer in the winter.

Summerhouse Stained Light Brown. **Size: 6ft 6" x 8ft 6"**

Interior of a furnished Garden Building

Cushioned upholstered Garden Building option

Summerhouse stained clear. **Size: 6ft 6" x 8ft 6"**

- Cedar Shingle Roof & Ridge Finial
- White wood internal floor
- 4mm English toughened safety glass
- Internal match board clad interior ceiling
- Cedar shutter system, glazed or cedar panelled sides for ideal use all year round
- Quality woven 100% solution-dyed acrylic for all furnishings

WESTERN RED CEDAR COLDFRAME

6ft x3ft Cedar Coldframe. Colour–Clear.

4ft x2ft Cedar Coldframe. Colour–Clear.

We use only the highest quality Western Red Cedar in our coldframes and, as with our entire greenhouse range, these units are created with high precision mortice and tenon joints.

Chrome handles and hinges give an elegant look and the external cedar supports allow the tops to be held open for easy access into the frame. All models have opening tops, each one with a single pane of 4mm English toughened safety glass. A choice from our standard colour collection is available.

All coldframes have a unique hinge system that allows you to remove the lids with just one screw- ideal for the summer months. The aluminium hinge system spans the whole length of the coldframe fully supporting each individual lid. A full length hinge reinforces and protects the coldframes from strong winds and adverse weather.

8ft x 2ft	**£1070**

****The prices listed above for coldframes include VAT and assembly. The surcharge for delivery will vary depending on the distance you are from Bramshall, Staffordshire. ****

WHY CHOOSE WESTERN RED CEDAR *(THUJA PLICATA)*?

Beauty: Found in Canada's Pacific Northwest. Western Red Cedar is renowned for its natural and outstanding physical properties, with a uniform of fine grained texture combined with a palette of warm, mellow tones ranging from light amber to deep honey brown. It's rich colour is beautifully complimented by a natural satin lustre and a unique and subtle aroma.

Durability: Western Red Cedar produces natural oils that act as preservatives to protect the wood from insect attacks and decay. It's ability to produce such preservatives increases with age, allowing the wood to withstand years of usage. In addition it is a very stable wood that lies flat and stays straight. Compared to other woods, it boasts a very low shrinkage value, which makes it ideal for use in high-moisture areas.

Practicality: Beauty aside, Western Red Cedar's practicality and cellular structure creates interior air spaces that give it an insulation value higher than most woods. Buildings which feature cedar panelling and siding tend to stay warmer in the winter.

Please Note: All of the timber used by Woodpecker Joinery is supplied by members of The Timber Federation who recognise the responsibility and importance to protect the forests for future generations. Our timber is also all PEFC certificated.

CHOICE OF STANDARD COLOURS

Light Brown **Clear** **Dark Brown** **Holly Green** **Red Cedar**

Our greenhouses are pre-treated with Premier Wood Preserver by Barrettine which provides the following properties:

The special formulation of Barrettine allows deep penetration of the fungicide into the wood
- Protects against rot, decay and unsightly mould growth
- Contains water repellent waxes
- Harmless to plants when dry

CEDAR STAGING

22” x 46” Cedar Staging.

Our superior Western Red Cedar staging combines the natural beauty of cedar with strength and durability, giving a quality finishing touch to your greenhouse. A lift-out bottom shelf provides flexibility and additional storage space to help you to get the most from your greenhouse.

PRICE LIST FOR THE STANDARD SIZES:

18” (475mm) deep x 46” (1175mm) long	**£105**

CONTEMPORARY CEDAR WATER BUTT

Save your rainwater in style! Our contemporary Cedar Water Butt has the beauty of Western Red Cedar wood and the durability of plastic, making it ideal for the modern eco-friendly gardener. Handmade, it comes with a brass tap fitted at the base and lift-off lid and is lined with a high density polyethylene (HDPE) liner to prevent leaks.

The water butt comes with a cedar plinth as standard and can be stained with one of our standard colours. This is a product to complement your cedar greenhouse perfectly.

Height: 1200mm Width: 700mm
Depth: 700mm Capacity: 65 gallons

Price: £295
Price includes VAT but not delivery

TRADITIONAL OAK WATER BUTT

As a more traditional water-saving solution, we are pleased to offer this traditional oak cask which was originally used by Scottish and Spanish distilleries in the course of maturing malts and sherry. Each has been individually adapted into a water butt. Not only eye-catching but an environmentally friendly method of conserving your water. It has a removable oak lid with a cut out for downpipe access and oak handle. A brass tap is fitted at the base. The timber is treated with Danish oil to restore the barrel to its former beauty. An ideal addition and first class product to complement your cedar greenhouse.

Height 39" Diameter 27/30"app
Capacity: 56 gallons approx.

Barrel Price: £155
Stand price: £20

****Price includes VAT. Please note that we only supply our Oak Barrel water butts with greenhouses and cannot supply separately****

PLASTIC WATER BUTTS

These attractive water butts are a modern take on a traditional style. The high quality polyurethane is a durable and lightweight material, which has been expertly finished with brilliant attention to detail.

We have a full range to choose from, including:

Rustico Water Butt 200L £215

Finesse Butt 300L £395

Timberly Water Butt 200L £265

Barrique Water Butt 270L
£270

Tuscan Water Butt 200L
£215

****Plastic water butt prices include VAT and delivery****

CHOOSING A SITE FOR YOUR GREENHOUSE

If you already have a level, or nearly flat site it is an ideal place to position your greenhouse as it will require less work and make it easier to achieve a good floor area for the foundations. We require a firm, flat base for our greenhouses to sit on, to ensure that minimum water can enter the greenhouse and the structure is properly supported.
Please be aware that overhanging trees can damage a greenhouse and to reduce the risk it is recommended to avoid such an area. However if this is not possible do not worry as pruning provides a solution to the problem.

PREPARATION OF GREENHOUSE BASES

1) Paving slabs or a concrete pad

Example slabbed base for a cedar greenhouse

Example concrete base for a cedar greenhouse

The base should have a 2” perimeter around the outside dimension of the size of greenhouse you have chosen (which can be found on our website or supplied by our technical team). Please note that a larger perimeter than this can lead to water sitting around the greenhouse, whilst a smaller perimeter can make it difficult for us to fix the greenhouse down securely.

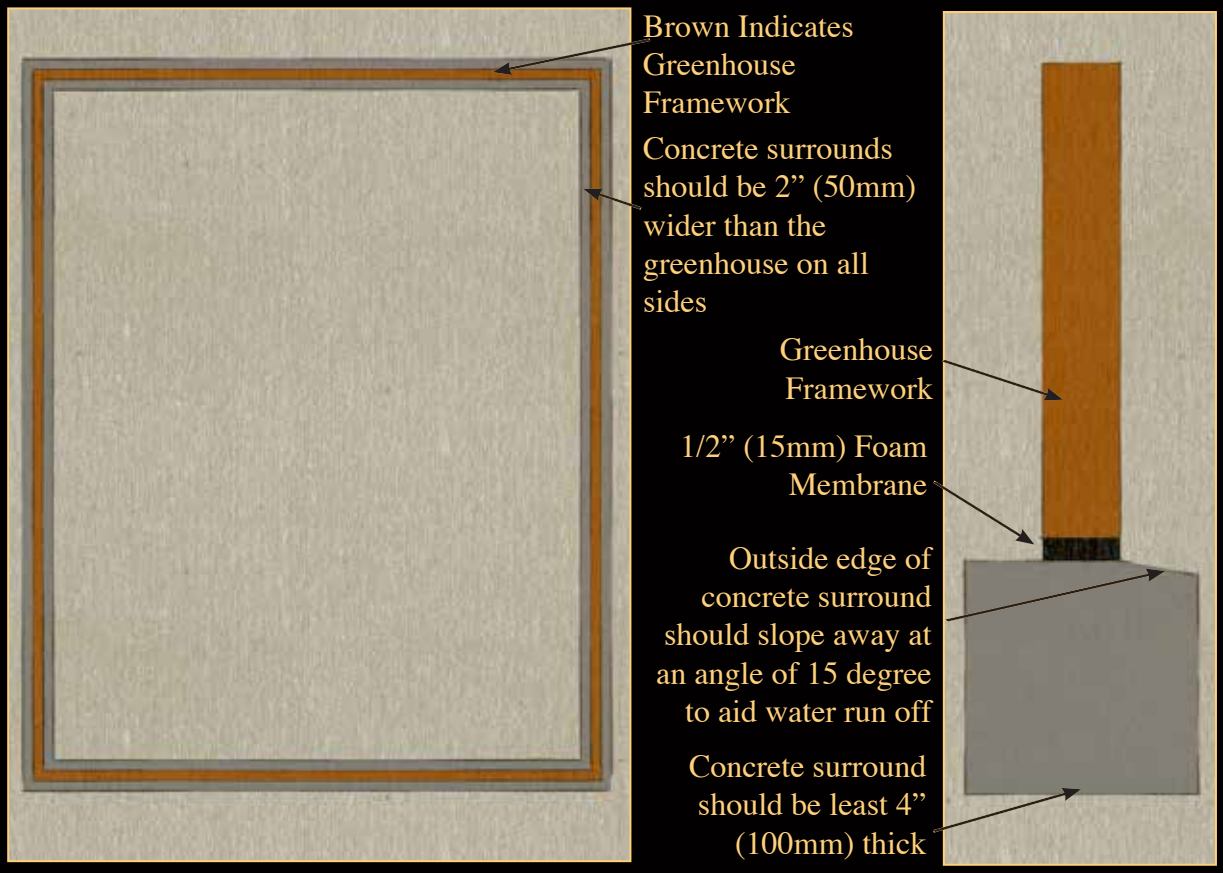
2) Brick Plinth

Build a brick plinth to the external dimensions of your chosen greenhouse, which can be found on our website or supplied by our technical team. The plinth must extend around the complete footprint of the greenhouse and there should not be a space at the door way.

3) Dwarf Wall

Once you have chosen the size of your greenhouse, have the wall built as closely as possible to the size that has been quoted for (external dimensions). We allow a tolerance of 0-70 mm to accommodate different sizes of bricks, mortar joints etc. Once the dwarf wall has been constructed we would ask you to forward the external sizes of your wall and height at the doorway to us.

4) Concrete surround



Build your concrete surround 4” wider than the greenhouse chosen and a minimum of 6” wide.

It may be possible for us to arrange preparation of greenhouse bases within a 75 mile radius of Bramshall, Staffordshire. Contact us for more details.

Please do not hesitate to contact our technical team should you need any further advice.

INTERNATIONAL

The quality of our products has now earned us an international reputation and we have exported a number of our greenhouses to Europe and even beyond! We have installed greenhouses in Ireland, France, Germany, Belgium, Switzerland, Denmark and Australia. Below are some photographs of our international greenhouses.

This 12ft x 20ft Kingsbury greenhouse, stained clear, was delivered and installed in the Blue Mountains, New South Wales, Australia. The fully panelled greenhouse exhibits great heat insulation, perfect for climates which encounter cold overnight temperatures.

This 12ft x 18ft Bromley greenhouse, stained clear, was installed in Biot, South France. The louvre vents allow optimum ventilation during the warm summer months and blinds shade the south side from the fierce summer sun. The combination of cedar panelling and glass to ground gets the most from the climate all year round, with insulation from the cedar during the winter and maximum sunlight reaching the north-facing side.

We have installed several greenhouses in Switzerland, including this 10ft x 21ft Bromley greenhouse with an internal partition, cedar panelling at one end and contemporary cedar water butts. The door in the long side raises the eaves height to 6ft 6”, giving an increased internal working space and ample room for taller plants and vines.

HOW TO PLACE AN ORDER WITH WOODPECKER JOINERY

This is a very simple process. Please contact us with your requirements by telephone, email or letter. We will then provide you with a quotation and our design team can work with you to provide drawings and specifications if you require something more bespoke.
Once you are happy with your quotation, we provide an order form, which we require you to complete, indicating your choice with regard to any optional extras, design features and the colour. We may provide additional forms to indicate how you would like the doors to open and about access to the site for our installation teams.

To secure your order, we ask that you sign and return the forms with a 10% deposit. This can be either by cheque made payable to *Woodpecker Joinery (UK) Ltd or by card payment over the phone. Please note that there is a 2% surcharge on credit card payments.*

Once we have received your order with the deposit we will send you a confirmation and offer a greenhouse installation date of your convenience. We will require someone to be present during the installation. If you are having a bespoke greenhouse, we will require all measurements of your dwarf wall no later than 4 weeks prior to the installation date.

On the installation date, our fitters will install the greenhouse to our high standards and your requirements and make sure that everything is as it should be before they leave. Full payment is required on the day of installation. **The greenhouse will remain the property of Woodpecker Joinery (UK) Ltd until paid for in full.** We guarantee our greenhouses (excluding glass) for 10 years, but provided that they are looked after, they should last and provide enjoyment for many, many more years.
